

SynchronEyes®

Classroom Management Software

Focus Attention

Keeping students on task in the classroom can be challenging. Students get distracted. You get overloaded with questions. And suddenly you've run out of class time. With SynchronEyes software, you focus and guide student activities so students can focus on learning.

The intuitive interface meets teachers' needs. On your desktop, you can view all your students' computer screens, monitor their activities and stay in touch with their progress. To keep them on track, you can block access to certain applications or to the Internet, or even lock all computers and keyboards. To help their learning, you can broadcast your screen, or any student screen, to everyone.

Reach Every Student

SynchronEyes software gives you several ways to communicate with students. When class begins, you can easily distribute files and launch applications on all computers at once. Students can send questions to you directly, and you can either respond individually or set up a chat session that includes others. When you've finished a section, you can create a quiz, send it to the class and have the software mark the answers when students finish.

Keep students on task and on time with this software application from SMART – the leader in classroom collaboration products. With SynchronEyes software, your students can learn more and do more in the limited time you have in the lab. You'll be amazed at how much they can really accomplish.

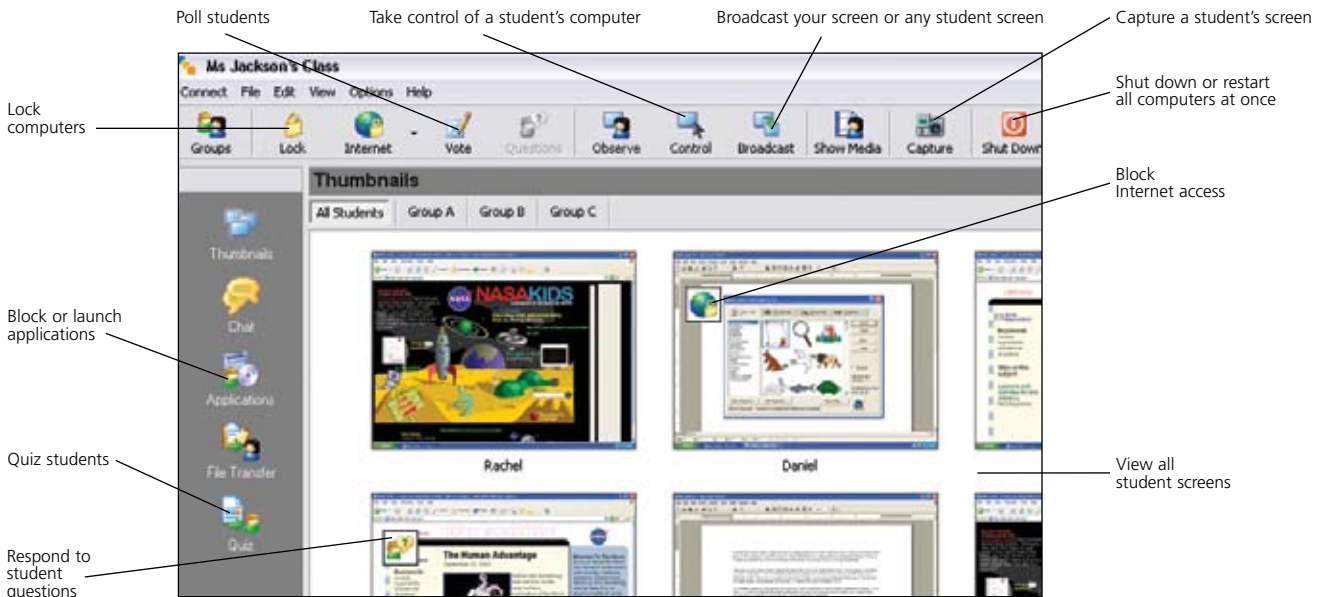

"I have been using SynchronEyes software for three years now, and I love it. I can control who is on the Internet, and when. I can lock students out of the computers during lectures and while giving directions. I can even create online tests – the software grades the tests and immediately gives each student a grade. I am not sure how I managed before I had this software."

*Theresa Taylor, Business Teacher
Cape Central High School
Cape Girardeau, MO, U.S.*

Lock all computer screens and keyboards when you need to address the class.

Features

Increase Your Power to Teach

Monitor all screens – Observe all student screens from your desk.

View screen thumbnails – Student desktops appear as thumbnail images that you can group, resize and arrange.

Arrange thumbnails on screen – Sort the thumbnails of all student desktops to match your classroom layout, or put them in any other configuration you want.

Make class lists – Automatically connect students and create class lists that can include any students connected to your network.

Go wireless – Reach beyond the walls of your lab to monitor and control students on a wireless network.

Add teachers – Let multiple teachers, aides or administrators monitor student computer screens in your classroom.

Customize settings – Set up SynchronEyes software just the way you like by personalizing the settings to reflect your teaching needs.

Create a Collaborative Classroom

Broadcast your screen or any student screen – Demonstrate a concept or example by sharing your screen or any student screen with the rest of class.

Show video – Broadcast any multimedia file to any student screen or to the entire class.

Hand over control to a student – Choose a student to demonstrate an idea to the rest of the class during your teacher broadcast.

Control a student's computer – Take or share control of student computers so that you can remotely guide them through a particular task.

Respond to student questions – Keep disruptions to a minimum by encouraging students to ask you questions using the software.

Create and monitor chat sessions – Chat with students directly, or create a controlled chat environment between individuals or groups.

Poll students – Students can vote on a yes-or-no question, and the software will automatically tally the votes.

Capture screens – Take a time- and date-stamped screen capture of any student's computer to show progress or to document misconduct.

Use with other SMART products – Control, monitor and annotate over student computer screens from the SMART Board™ interactive whiteboard just like you would from your own screen.

Keep Students on Task and on Time

Control Web access – Block Internet access or allow only selected websites to keep students on track.

Block applications – Stop students from accessing any applications you've selected, including games, specific programs or groups of programs.

Launch applications – Remotely launch and close applications on each student's desktop to structure class time.

Lock computers – Prevent distractions by locking down individual computers, selected groups of computers or the entire lab.

Transfer files – Send documents to students or collect student assignments without leaving your computer.

Turn all computers off – Shut down all computers simultaneously with a single mouse click.

Make Testing as Easy as 1, 2, 3

Quiz students – Create quizzes with the Quiz Wizard, distribute them from your computer and have the software automatically mark student responses.

Use any format – Make quizzes that include any mix of multiple-choice, short-answer, matching, ordering and essay-style questions.

Import existing quizzes – Include mathematical symbols and rich-text formatting, and import data from existing text files.

Export marks to Excel® – Export quiz results to Microsoft® Excel for easy reporting.

System Requirements Windows® Operating Systems

Teacher station – Pentium® III processor at 500 MHz or equivalent • 128 MB of RAM • Windows 98 SE, 2000, Me, XP or Windows NT® 4.0 SP6 • 25 MB of free hard disk space • 800 x 600 or higher resolution display with full color • Microsoft® Internet Explorer 5.0

Student station – Pentium II processor at 300 MHz or equivalent • 64 MB of RAM • Windows 98 SE, 2000, Me, XP or Windows NT 4.0 SP6 • 10 MB of free hard disk space • 640 x 480 or higher resolution display with full color • Microsoft Internet Explorer 5.0 • 10 Mbps TCP/IP network interface adapter
