

Rear Projection SMART Board™ 2000i

Interactive Whiteboard

The all-in-one system for enhanced classroom outcomes

The *Rear Projection* SMART Board 2000i interactive whiteboard turns your classroom into an interactive learning center that engages students and improves learning. The 2000i's bright, touch-sensitive display invites your students to "see and do," for a proven approach that makes understanding material and retaining information easier.

A cost-effective alternative to systems that require a separate projector, media cart, audio system, floor stand, interactive whiteboard and cabling, the 2000i combines all of these elements in one easy-to-use, mobile package. A unique height adjustment feature makes the 2000i accessible to all users, including those with special needs. The 2000i's durable display provides a large workspace, and the integrated rear-projection system means you can work without casting a shadow on the screen.

Enrich lessons with interactivity

The 2000i enriches lessons by letting you write in digital ink over any application or website on the display. You can then edit, print, save or post your notes for future reference, saving you time.

The heart of every SMART Board interactive whiteboard, including the 2000i, is its feature-packed SMART Board software. Complete with a gallery of images and templates that support your curriculum, SMART Board software is intuitive and easy to use, which means more users and a greater return on your technology investment.

Regardless of teaching or learning style, the flexible 2000i adds interactivity and increased engagement to any classroom environment.

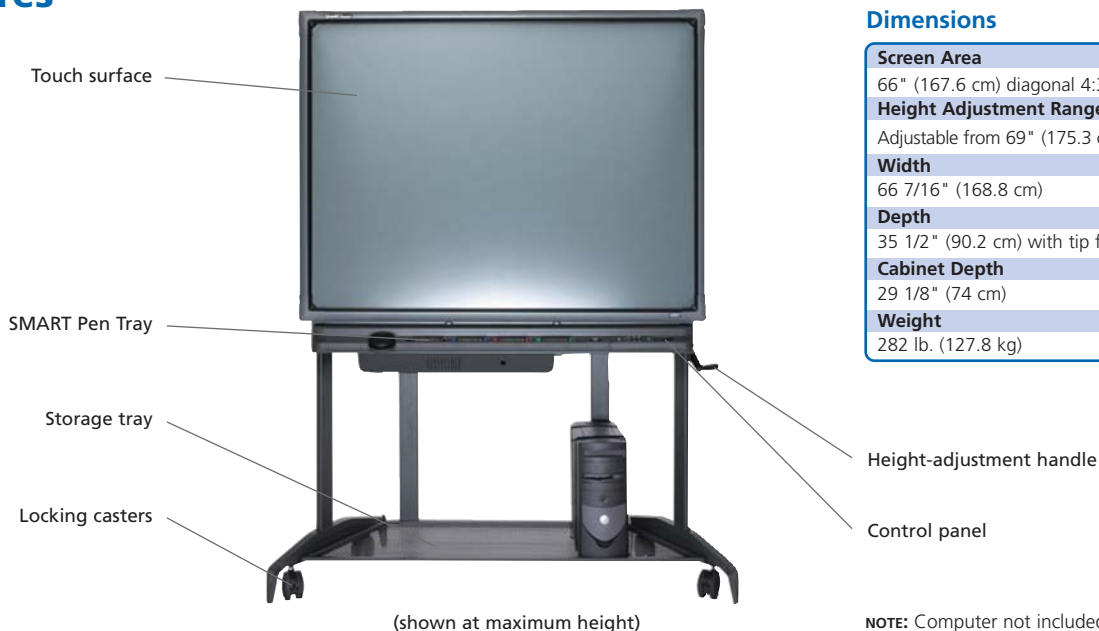

"The 2000i is the only interactive whiteboard of its kind available for educators at a price they can afford. Advantages such as the shadow-free display and height adjustment make the 2000i a great teaching tool."

*Christopher Klein, District Technology Coordinator and Teacher
Maplewood Richmond Heights School District, Maplewood, Missouri, U.S.*

Write over any application or website and then save your lesson to a single file.

| Screen Area |
| 66" (167.6 cm) diagonal 4:3 aspect ratio |
| Height Adjustment Range |
| Adjustable from 69" (175.3 cm) to 83" (210.8 cm) |
| Width |
| 66 7/16" (168.8 cm) |
| Depth |
| 35 1/2" (90.2 cm) with tip feet retracted |
| Cabinet Depth |
| 29 1/8" (74 cm) |
| Weight |
| 282 lb. (127.8 kg) |

Height-adjustment handle

Control panel

NOTE: Computer not included

Touch system – DVIT™ (Digital Vision Touch) technology is the magic behind SMART's proprietary optical touch system. It lets you use your finger as a mouse and write in digital ink on the screen over any application or website – without special tools or reduction in image quality.

Save function – Save all your work to a single file that works with, or is compatible with, both Windows® and Mac OS® operating systems. Notes and graphics are saved as objects that you can manipulate and reorganize. Or, write and save notes directly into popular Microsoft® Office applications and AutoCAD®.

SMART Pen Tray – Sensors detect when a pen or eraser tool is picked up from the SMART Pen Tray. Buttons on the tray allow you to choose an On-Screen Keyboard or a right-click.

Projection system – SVGA (800 x 600) projector with short-throw lens comes installed. A 2000i model with an installed XGA (1024 x 768) projector is also available.

Control panel – Projector power, input sources and volume controls can be controlled from the front of the unit.

Height-adjustment handle – The handle can be used to adjust the screen height between 69" (175.3 cm) and 83" (210.8 cm).

SMART screen – The diffusion screen reduces glare to deliver a high-contrast, uniform image with a wide viewing angle.

Audio system – Control the volume of the stereo-amplified speakers from the front of the cabinet.

Locking casters – Four durable casters make the 2000i easy to reposition and lock into place.

Storage tray – Place your computer and peripherals on the bottom tray for easy access.

Laptop shelf – The shelf attaches to either side of the cabinet.

X-Port™ 20 switch (optional) – Using the control panel, easily switch between your computer and a connected laptop.

Room-control module (optional) – This module integrates the 2000i control panel with a room-control system.

Warranty – Two-year limited equipment warranty on the screen, cabinet and projector. 500 hour/three month warranty on the projector lamp.

SMART Board Software

Notebook™ software

Create, organize and save notes, drawings or screen captures, and access thousands of free images and templates. Convert handwriting to text, attach files and save files in various formats (e.g., PDF, HTML).

SMART Board Tools

Type with the On-Screen Keyboard, write over digital video, focus attention with a spotlight or screen shade, and much more.

LinQ™ software

Control your laptop or Tablet PC from the 2000i. LinQ software uses your wired or wireless network to create a quick connection between devices.

System Requirements for Windows Operating Systems

Pentium® 150 MHz processor (450 MHz or faster recommended) • 128 MB of RAM (256 MB recommended)
 • Available powered USB port • Approximately 160 MB of free hard disk space for a full installation • Windows NT® 4.0 (SP6), Windows 98 operating system or later • Microsoft Internet Explorer 5.0 or later • Macromedia® Flash® player version 7.0.19 or later (recommended)

System Requirements for Macintosh® Computers

400 MHz processor (800 MHz or faster recommended) • 128 MB of RAM (256 MB recommended) • Available powered USB port • 50 MB of free hard disk space for minimum installation, 115 MB for full installation with Gallery collections • Mac OS X version 10.1.5 or later (Java version 1.3.1 Update 1 or later)
 Other versions of SMART Board software are available for UNIX® and Linux® systems, as well as for earlier Windows and Macintosh operating systems.
